BAGAIMANA? PENYAKIT KENCING MANIS

Boleh Terjadi Kepada Anda...

How diabetes occurs to you

Diabetes berlaku apabila badan mengeluarkan terlalu sedikit Insulin atau Insulin yang di keluarkan tidak berkesan. Ini akan mengakibatkan paras Gula Dalam Darah tidak normal dan jika dibiarkan akan menyebabkan Komplikasi yang serius.

"Insulin Adela sevens HORMON" yang di hasilkan dalam pankreas.

Ita berfungsi mengekalkan gula dalam darah pada paras normal dan membantu mengeluarkan glukosa memasuki sel badan. Akibat kandungan insulin tidak mencukupi atau tidak berkesan dalam kalangan pesakit Diabetes, gula tidak dapat memasuki sel badan menyebabkan paras gula dalam darah akan meningkat.

Diabetes occurs when the body does not produce insulin or does not proper function. This will cause the blood sugar level was not normal and if left unchecked will lead to serious complications.

"Insulin is a HORMONE" which was produced in the pancreas.

It works to maintain blood sugar at normal levels and helps glucose enter the cells producing insulin in the body . Due to inadequate or ineffective in patients with diabetes, sugar cannot enter body cells cause blood sugar levels will be increase.

10 Tanda-tanda Awal Penyakit Diabetes

10 Early Symptoms Diabetes Disease

1. Kerap Buang Air Kecil
Often urination

2. Kerap Haus
Often thirst

3. Kerap lapar
Often hungry

4. Selalu Rasa Letih
Always feeling tired

Rakyat tidak takut kaki kudung

PENSYARAH Jabatan Psikiatri, Fakulti Perubatan Universiti Putra Malaysia, Profesor Dr. Azhar Mohd. Zain berkata, ramai penduduk negara ini yang mengambil mudah terhadap sesuatu penyakit.

"Ujarnya, walaupun banyak kes seumpamanya disaksikan di depan mata, namun mereka masih tidak gerun."

"Mereka boleh melihat kesan komplikasi kaki itu pada orang lain tetapi tidak takut kerana menyentuh ia manusia."

6 Ancaman diabetes
disebabkan Oleh
6 Threat Caused By Diabetes

Pankreas GAGAL
Merembeskan Insulin
Pancreas Fails To Produce Insulin

Mata — Kabur/ Buta/Juling
Eyes — Blurred / Blind / Squint

Kulit — Kering/ Bersisik / Ubah warna/
Sel tubuh mati lama ke lamaan kulit bertukar hitam
Skin — Dry / Scaling / Colors change / Gangrene /

Arteri (Saluran Utama) — Tersumbat perlu buat by-pass
Artery — Blockage need for by-pass

Jantung — Lemah / Penyakit Darah Tinggi seumur hidup
Cardio — Weak / Blood Pressure

Pankreas @ Pancreas
Buah Pinggang — Akan rosak dialisis seumur hidup

Kidney — Dialysis

Sistem Saraf (Urat) — Kebas (Kaki/Tangan)
Risikonya apabila luka jadi berlubang lewat rawat perlu di potong

Nervous System — Numbness legs and arms
The risk when wound it can be ulcer .if cannot cure must cut.

Hjh Jamilah Bt Hj.Wahab - 65 Tahun/Age 65. (Dari/From Sg. Udang, Melaka, Malaysia)
